EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond Roberts on July 7, 2006.

The application has been amended as follows:

Please see the attached claims filed in the response under 37 CFR 1.116 on July 7, 2006 as a result of discussions from July 5-7, 2006. This amendment amends claims 1, 12, and 17, and cancels claims 10-11, 15-16, and 19-20, these amendments placing the instant application in condition for allowance.

Also, claim 8 is amended as follows for purely grammatical reasons as to correct a typographical error.

8. The measuring apparatus of claim 1, wherein said detectors include at least [on] one member of the set consisting of bi-cell photo diode units, quad-cell photo diode units, and photo diode arrays.

Allowable Subject Matter

Claims 1-9, 12-14, and 17-18 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claims 1, 12, and 17, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a measuring apparatus and corresponding method for

measuring positional information about a target, the apparatus and method comprising a light source that provides light beams to at least two optical channels, the light source including a modulator that produces the light beams including a modulation characteristic, these optical channels each including an interferometric arrangement featuring the elements claimed, the system also including a processing system that processes the signals from the detector and receiver in the optical arrangement into position data suitable for communication to an external system, the processing system including a demodulator that processes at least one of the received signals with phase sensitive detection, in combination with the rest of the limitations of the above claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley can be reached on 571-272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
